PROFESSIONAL SUMMARY

Detail-oriented Cloud & Systems Engineer with over 3 years of experience in enterprise infrastructure support, cloud environment maintenance, and automated incident response workflows. Proven track record of administering Windows and Linux operating systems, managing Microsoft Entra ID deployments, and utilizing PowerShell, Python, bash, SQL scripting, and leverage AI tools to eliminate manual overhead. Adept at analyzing system performance logs, driving root cause analysis, and implementing infrastructure improvements to guarantee high availability and user-visible uptime in global distributed environments.

TECHNICAL SKILLS

- **Cloud & Operating Systems:** Microsoft Azure, AWS, Microsoft Entra ID, Windows Server Administration, Linux (Ubuntu, CentOS), Hybrid Cloud, TCP/IP, DNS, Subnets, Network Security Groups
- **Automation & DevOps:** Azure DevOps Pipelines, GitHub Actions, Git Version Control (Branching, Merging, PRs), Terraform, Docker, PowerShell, Bash, Python, DevSecOps
- **Databases & Monitoring:** MS SQL Server, Relational Database Troubleshooting, Environment Log Analysis, Instrumentation, Monitoring, Alerting, Kibana, Dynatrace
- **Methodologies:** ITIL Framework, Agile, Scrum, Incident & Change Management, Root Cause Analysis, Runbook & SOP Documentation, SLA/SLO Adherence

PROFESSIONAL EXPERIENCE

Systems Technician
Lerners LLP

Sep 2024 – Present
Toronto, ON

- Provide day-to-day operational maintenance across Windows enterprise servers, network endpoints, and corporate Azure cloud environments to support mission-critical corporate infrastructure.
- Execute strict change management, application release workflows, and hotfixes, minimizing production environment downtime by adhering to structured deployment checklists.
- Administer user provisioning, group policies, and role-based access control (RBAC) using Microsoft Entra ID to secure multi-tiered cloud resources.

- Diagnose complex environment and software problems by deeply analyzing system logs, authoring new technical Standard Operating Procedures (SOPs) that increased incident response efficiency.
- Leverage PowerShell scripting to automate routine administrative tasks and eliminate manual involvement in server provisioning.

IT Technician
Wet'n'Wild Toronto

May 2023 – Sept 2023
Brampton, ON

- Analyzed system reports and localized application logs to troubleshoot and resolve recurring software and database conflicts under tight operational windows.
- Configured, monitored, and maintained localized network switches and endpoint infrastructure to guarantee high availability for core operational systems.

Technical Support Analyst
Humber College

Jan 2023 – Dec 2023
Toronto, ON

- Delivered infrastructure and technical support within an ITIL-aligned framework, resolving complex hardware, software, and network requests for a large-scale institutional network.
- Managed account lifecycles, access tier modifications, and secure credential provisioning utilizing Active Directory and Windows Server tools.

PROJECTS PORTFOLIO

Enterprise Access & IaC Sandbox (Home Lab)

Ongoing

- Configured multi-tenant cloud architectures, managing user/group structures with RBAC roles in Azure to simulate real-world enterprise onboarding, offboarding.
- Utilized Git for branching, merging, and pull requests to track cloud environment states.
- Deployed Infrastructure as Code using Terraform to provision modular infrastructure resources and used Docker containers to test deployment strategies.

SIHMON: Smart Infant Health MONitor

December 2023

- Engineered an IoT telemetry pipeline utilizing Python to capture real-time sensor data and stream it securely into cloud-based data repositories.
- Developed a backend data processing component to ingest real-time payloads, managing data flow and triggering automated alerting thresholds based on pipeline events.

EDUCATION

Computer Engineering
Humber College

Jan 2021 – Dec 2023
Toronto, ON

- **Core Focus:** Cloud lab environments, deploying Virtual Machines, configuring Virtual Networks (VNETs/Subnets), Network Security Groups, and access lifecycle management.
